Filters

Titles

Captions

Stickers and Overlays

Music

Hold to live record – or play a video.

Mute used to remove audio (especially when captioning)

Power tip: I record all videos and pictures in the Camera App.. then I can easily edit in Clips. If you video in clips, it will only be available in clips.

Power tip: Make sure to practice in Clips. If you are recording, and want captions, you have to do that when you add the clip, Common beginner problems – you have to re-record.
