Apple Teacher is a program through Apple that allows teachers to gain free certification using Apple Products.

There are two tracks – iPad Track and Mac Track.

You can achieve Apple Teacher by pursuing either of the two tracks and completing all the badges.

How to start:

Log In to <http://appleteacher.apple.com>

Click on the Badge you are interested in. On each is a link to a book in the IBooks store so you can learn more.

Click on Mac of iPad badges

Each Badge has a 5 question test – get 4 questions right and earn the badge.

If you don't know an answer, follow the directions to download the iBook on the topic and go to the pages.

Once you earn all the badges you will be an Apple teacher. You will be subscribed to special newsletters and content for teachers.

Power tip: Search the Apple iBooks Store for “Apple Education” to download all the books at once so they are easier to access.

Clips to Accommodate. (session 1.42)

If you are doing Flipped videos – did you know that you should be captioning the videos for students – Clips allows you to make easy movies that can have a caption included using Siri which can be corrected.

Basics of Clips (with a great European Accent)

<https://www.youtube.com/watch?v=Mf335184MfQ>

Editing text in the clips

<https://www.youtube.com/watch?v=jdD3SbbSACk>

Filters

Titles

Captions

Stickers and Overlays

Music

Hold to live record – or play a video.

Mute used to remove audio (especially when captioning)

Power tip: I record all videos and pictures in the Camera App.. then I can easily edit in Clips. If you video in clips, it will only be available in clips.

Power tip: Make sure to practice in Clips. If you are recording, and want captions, you have to do that when you add the clip, Common beginner problems – you have to re-record.

Content Creation to Mix up Literacy. Session 4-42

Here are the tools that we talked about today, remember by having students make books, or videos, you can have students create memes to capture big ideas or summarize work. Here are three easy tools available both online and as apps that can do this.

Adobe Spark Video

<https://spark.adobe.com/>

Adobe Spark Video Tutorial: <https://www.youtube.com/watch?v=-nKTi5ydKbw>

Book Creator for Chrome (40 books free online, and App costs \$4.99 once)

<http://app.bookcreator.com>

Book Creator for Chrome Tutorial with Monica Burns (starts at 14 minutes)

<https://www.youtube.com/watch?v=s2n6wj06hsQ>

Canva – Image Editor (Free online and as an app, if you use their designs can buy images for \$1)

<http://www.canva.com>

Tutorial - https://www.youtube.com/watch?v=a3fnrjq_R4M

Integration ideas:

Have students make a comic book to continue a story or create a prequel

Have students create a meme to show how a character feels or summarize main ideas.

Have students act out or record a video acting out a scene or make a convincing movie to discuss big ideas.

Allow students to propose new ideas and be surprised where they go.
